Dear Investor,

Russian president Vladimir Putin has declared WAR on the West ... on America ... on the U.S. economy ... and on your investments.

With each passing day, he is growing bolder — proving to himself and the world that there is little anyone can do to stop him.

In a recent speech given to historians and political analysts from 25 countries, Putin mentioned the Cold War ***no fewer than 6 times.***

And he certainly hasn't been shy about his anti-U.S. sentiments ...

He has compared Western leaders and their sanctions against Russia to Adolph Hitler and his "people-hating ideas" of World War II.

In a sinister warning, Putin reminded his audience that his country has a formidable, combat-ready army and that, *"No one will ever attain military superiority over Russia ..."*

But Putin's not just spouting rhetoric about a new Cold War with the U.S. He's taking action, too...

Vladimir Putin's 5 Cold War Strategies

Common strategies during the first Cold War included proxy warfare, propaganda, espionage, arms supplying to other nations and threats of mutually assured destruction.

Today, as we enter "Cold War II," we see that not much has changed ...

While Putin seems to be taking the lead in flaming the fires of distrust, President Obama is not far behind in launching his own brand of military and political strife.

You see, both leaders are heating up the old Cold War strategies, albeit with some updated twists ...

PUTIN'S COLD WAR STRATEGY #1: Ramp Up Russian Military Exercises AND Pump Up the Propaganda ...

Soviet military exercises

In an effort to show off its military prowess, the Russian armed forces recently staged its biggest post-Soviet military drills.

"Big" might be an understatement to describe this saber-rattling display.

For five days in the Far East, a reported 100,000 Russian servicemen, up to 1,500 tanks, 120 aircraft, 70 ships and 5,000 pieces of weaponry took part in the exercises.

Military attachés from around the world — including China, Malaysia, North Korea, Peru and Venezuela — watched this display of Russian military might with rapt-attention.

Putin used this well-publicized event — complete with Twitter coverage and YouTube videos — as part of his propaganda machine to spread the message of Russia's rapidly growing military strength.

But let me be clear, these exercises were not just for show. The truth the Obama administration has been reluctant to publicize is that Russia has invested heavily in new military technology and weaponry.

The Russian arsenal includes an estimated ...

- ✓ 15,500 tanks ...
- ✓ 27,607 Armored Fighting Vehicles (AFVs) ...
- ✓ 5,990 self-propelled guns ...
- ✓ 3,781 Multiple Launch Rocket Systems (MLRS) ...
- ✓ 311 Intercontinental Ballistic Missiles (ICBMs) ...
- ✓ 700 Fighters and Interceptor planes ...
- ✓ And 63 submarines (2 capable of launching ICBMs).

And while Putin has been on a military spending spree, Obama has been cutting back ...

According to the Pentagon's top generals, Obama's defense spending caps have forced them to slash troop numbers, cut training programs and dismantle modernization programs ... all at a time when international conflict is heating up!

It's only recently Obama has awakened to the threat world events pose on the nation's security. He's asked Congress to break current military spending caps and allocate \$561 billion to the U.S. defense budget in 2016 — **an increase of over \$38 billion.**

So, the question is not IF or WHEN U.S. defense spending will increase ... it's already begun!

A 5,312% gain!?! Better believe it! That's what happened during the first Cold War when this giant in aerospace technology went from **\$1.06 a share to \$57.50.**

Your \$10,000 stake in this company would have turned into a mind boggling \$542,397!

More gains are around the corner for this and other aerospace firms. For details, keep reading to learn how you can download my FREE report, *Putin's 5 War Strategies: What You Must Do Immediately to Protect Your Wealth and Profit.*

PUTIN'S COLD WAR STRATEGY #2: Engage in a Dangerous Game of Cat and Mouse with NATO ...

U.S. Air Force General Philip Breedlove, the supreme allied commander in Europe, says there's been a perilous change in Russia's incursions into European airspace.

Russian fighters and long-range bombers are flying larger and more complex formations into international airspace over the Baltic Sea, North Sea and Atlantic Ocean.

In response, NATO has been sending their own jets to intercept and "escort" the Russian jets while they are in European airspace.

During these forays, the Russians have refused to use their onboard transponders or engage in radio contact with civilian air traffic control.

According to a statement released by NATO: *"This poses a potential risk to civil aviation as civilian air traffic control cannot detect these aircraft or ensure there is no interference with civilian air traffic ..."*

With over 100 incursions into European airspace in 2014 — a three-fold increase from 2013 — Putin's provocative game of cat and mouse with NATO is like a page torn straight out of the Cold War play book.

Invest \$20,000, walk away a millionaire! During the first Cold War, one U.S. military jet manufacturer skyrocketed from 83 cents a share to \$58.00 ... **An increase of a phenomenal 6,888% ...**

That's enough to turn every \$20,000 invested into nearly \$1.4 MILLION!

Many companies in this industry will soar again as global tensions heat up. For details, read my free report, *Putin's 5 War Strategies: What You Must Do Immediately to Protect Your Wealth and Profit.*

Did a Russian Plane Disable a U.S. Warship ... with a Mere Press of a Button?

The Russian media claims their military has a new technology capable of jamming a U.S. warship's missile defense system. They say it can easily render useless an entire warship's radar, communications and missile systems with the press of a button.

Case in point ...

Recently, a Russian Su-24 plane flew over the *USS Donald Cook* as it patrolled the waters of the Black Sea. The unarmed Russian jet carried an electronic device named "Khibiny."

As the Russian jet approached the American warship, it activated Khibiny. The Russians say that within seconds the device shut down all radar systems, information transmissions and control panels on board the destroyer, "as easily as turning off a TV set with a remote control."

The Russian jet then simulated a missile attack against the *USS Donald Cook*, flying over the vessel 12 times before departing.

In response to these claims, the Pentagon acknowledges the Russian plane flew provocatively close to the American warship. However, it refuses to say if the Russians disabled the ship.

So, whom do you believe? Have the Russians discovered a fatal flaw that allows them to quickly and easily disable a U.S. warship?

And will the U.S. respond by developing a similar technology (if it hasn't already)?

PUTIN'S COLD WAR STRATEGY #3: Build an Imposing Nuclear Arms Stockpile ...

Russia is investing enormous sums of money to revive its nuclear capabilities. According to the International Institute for Strategic Studies, the Kremlin dedicates a third of its defense budget to nuclear weaponry.

The commander of Russia's Strategic Missile Force, Lt. Gen. Sergei Karakaev, announced Russia will deploy a new heavy intercontinental ballistic missile within the next four years. This silo-based Sarmat ICBM is part of an **over \$700 billion plan for the Russian Armed Forces**.

By 2018, Russian nuclear forces will have 1,550 warheads and 700 deployed strategic nuclear delivery systems, including long-range missiles and bombers.

But Putin's nuclear escalation doesn't end with building new weapons and acquiring new technology ...

Moscow has at least twice since 2009 simulated nuclear attacks, including one targeting NATO member, Poland.

And now, for the first time in 40 years, the U.S. State Department admits Russia has surpassed the U.S. in nuclear weapons capability. Russia has 5,000 nuclear weapons of different tactical classes all located right next to Europe.

Compare this to the paltry 260 aging tactical nuclear weapons located in European NATO countries and you'll understand why Putin believes he has the upper hand in the European nuclear contest.

Imagine Iran with a Nuclear Weapon? It Could Happen if Putin Has His Way ...

Another Cold War ploy Putin is engaging in is providing technology and weaponry to "proxy nations" — countries that are at odds with the United States ... such as Iran.

Recently, Russia signed a nuclear agreement that could give Iran ***up to eight more civil nuclear reactors.***

The Russian state nuclear company, Rosatom, has agreed to build two reactor units at the Bushehr, Iran power plant. Additionally, the two countries are in talks to build two more units at Bushehr and four others elsewhere in Iran.

Rosatom also announced it would enter discussions with Tehran regarding manufacturing fuel rods in Iran to be used at the reactor units.

Understandably, this move prompted anxiety in the West because it could give Iran the infrastructure necessary to build its own arsenal of nuclear weapons.

In these troubling times, there are highly rated companies that are ready, willing and able to provide the United States with the technology it needs to counter the threats from Iran, Russia and other nations. I've selected three of these companies (which you can read about below) as my top investment recommendations.

PUTIN'S COLD WAR STRATEGY #4: Cozy Up to China ...

Putin is intent on establishing alliances and forging economic agreements with various nations, particularly in the wake of the sanctions imposed by the U.S. and its allies following Russia's military intervention in Ukraine and annexation of Crimea.

So it's no surprise that while the U.S. and Europe were busy imposing sanctions, Putin was working behind the scenes to seal a **\$400 billion, 30-year deal to provide natural gas to China.**

In total, Moscow signed a package of 38 deals with China, including a currency swap and tax treaty. And reports say that Putin is working on *yet another* major natural gas deal with China, also worth **hundreds of billions for Russia.**

And the timing couldn't be better. Russia desperately needs this influx of cash to help offset the huge losses it's experiencing due to the sanctions and plummeting oil prices.

The fact is Putin has been working on strengthening the China-Russia alliance for years and is well ahead of Obama in courting the Asian nation's favor.

Putin rightly sees China as a formidable ally, one that has experienced an astonishing resurgence in military and economic power in the last decade.

Unfortunately for the U.S., Obama realized this too late and is playing catch up in the game of forming strategic alliances.

Russia's ambassador to the U.S. said of Obama's belated attempts to reach out to China, ***"You are just pivoting to Asia, but we're already there."***

What would you do with an extra \$36 GRAND? You might have found out recently if you'd invested in this missile defense company. It rose 180% in less than 2 years ... **That's enough to turn a \$20,000 grubstake into a tidy \$56,032.**

And, as you'll find out in my new FREE profit guide — *Putin's 5 War Strategies: What You Must Do Immediately to Protect Your Wealth and Profit* — there's plenty of upside left for investors looking to get in on this gem of a company ...

PUTIN'S COLD WAR STRATEGY #5: Use Cyber Warfare to Cripple the Entire U.S. Infrastructure ...

Remember the espionage tactics of yesteryear? Spy rings, clandestine meetings, intelligence gathering, counterintelligence and sabotage ...

Well, today we can add "cyber espionage" and "cyber terrorism" to the mix ...

The Department of Homeland Security reports that a destructive "Trojan Horse" malware program developed by Russian government hackers has penetrated the software that runs the U.S. power transmission grid.

The malware could cause economic catastrophe by damaging or shutting down American oil and gas pipelines, power transmission grids, water distribution systems, wind turbines and even some nuclear power plants.

This nightmare scenario means control of American public utilities could one day be **in the hands of the Russian government!**

According to an ABC News report:

"DHS sources told ABC News they think this is no random attack and they fear that the Russians have torn a page from the old, Cold War playbook, and have placed the malware in key U.S. systems as a threat, and/or as a deterrent to a U.S. cyber-attack on Russian systems — mutually assured destruction."

Additionally, the new Russia-China alliance could come into play in future cyber attacks against America. In an ominous warning, former Defense Secretary Leon Panetta says the U.S. could one day become victim of a cyber "Pearl Harbor," perpetrated by China's and Russia's advanced cyber capabilities.

More than TRIPLE your money in just 18 months! — The 218% gains recently posted by this security products company could have turned your \$20,000 investment into more than \$62,000.

A Major Warning of an Explosion of Violence Directly Ahead ...

For over 30 years, I've studied the relationships between economic trends and warfare ...

Make no mistake about it: The cycles of war I research and write about — and their effects on the financial markets and world economies — ARE REAL.

These cycles are based on scientific studies of both domestic and international war data. I've published my findings as part of my work as Executive Director of the Foundation for the Study of Cycles.

What I've discovered is that war cycles are as concrete and predictable as the seasons of the year. They tell you, in no uncertain terms, when society is most likely to be predisposed to conflict, both domestically and internationally.

The fact is the war cycles are now ramping up all the way into the year 2020 and with an intensity that even I underestimated ...

The 17.7, 8.8 And 53.5 Year War Cycles Synthesized

Source: Larry Edelson, *Real Wealth Report* webinar, November 2014

But most importantly for you as an investor, these cycles also show a clear relationship between worldwide strife and the functioning of the financial markets, the flow of money between nations and the stockpiling of precious assets.

If there is only ONE THING you learn from this report (a truly simple concept, yet one many investors fail to heed during panic situations), I hope it will be this:

During times of war and conflict, money ALWAYS flows to the safest refuge. Discover and invest in that safe refuge, and you'll not only protect what you have, but you'll also position yourself for tremendous prosperity!

Follow **\$10 TRILLION DOLLARS** to the World's Last Bastion of Financial Safety!

Capital is literally *pouring* into the United States from abroad ... to the tune of more than **\$10 TRILLION DOLLARS in investments in just five years!**

Total foreign ownership of U.S. assets (excluding complicated financial derivatives) rose from **\$16.594 trillion** at the beginning of 2009 to a record **\$26.791 trillion** at the end of the first quarter of 2014.

That's an astounding 61 percent gain in five years, a record for such a short time period.

Of that \$10 trillion ...

- **\$4.088 trillion, or more than 40 percent,** was directly invested in portfolios that include equity investments, mutual funds and other equity-related investments.

Moreover ...

Nearly 20 percent of the \$4.088 trillion ... or \$820 billion ... came flooding in from foreign shores in 2013 alone.

But just why are savvy European investors moving their money out of Europe in droves and into the U.S. stock market? Why is Middle Eastern money flooding our shores? Why are Chinese investors moving funds to the U.S. hand over fist, especially into U.S. property markets?

The simple reason for this extraordinary capital flow is that of all the places to invest in the world today, the United States is the safest country for investors.

Despite our country's problems (and I don't deny we have a bucket load), we still enjoy one of the most open, liquid and diverse markets in the world.

Smart investors overseas realize what's going on in their own countries and globally and they want out ... NOW!

All of this is causing capital in nearly every corner of the globe to take flight, leaving risky countries or investments and heading toward safer U.S. shores.

These investors are *why* U.S. equities are in long-term bull markets. They are largely *why* property prices are doing well, especially in high-end markets such as New York, Los Angeles and Miami.

Soon, they will also be an important force driving commodity prices higher, especially precious metals.

My words of investing wisdom for you: Follow the BIG money – the \$10 TRILLION DOLLARS – the large international capital flows ...

The Stocks that SOAR During Times of Global Conflict

As the bloody chaos worldwide spreads — and specifically as Cold War tensions reignite between the United States and Russia — I predict the prices of select stocks will GO THROUGH THE ROOF.

Just take a look at the breathtaking gains these companies — many of which I'm sure you're familiar with — made during the **first** Cold War ...

The Red-Hot Stocks of the First Cold War (1947-1985)

Company	1947 Price	Height During Cold War (limited to 1985)	% Change
The Boeing Company	\$0.22	\$50.50	22855%
General Dynamics Corp	\$0.85	\$84.00	9782%
Lockheed Martin	\$0.83	\$58.00	6888%
Raytheon Company	\$0.88	\$57.50	6434%
Grumman	\$0.63	\$36.25	5654%
North America Rockwell / Rockwell International	\$0.75	\$41.75	5467%
United Technologies Corporation	\$1.44	\$44.25	2973%
Martin Marietta	\$1.88	\$44.25	2890%
General Electric Co.	\$2.88	\$65.00	2157%

Now, of course, I'm not suggesting you wait 30 or 40 years to realize your profits. While the first Cold War lasted many decades, I'm predicting Cold War II will coincide roughly with the latest war cycle ... a time period lasting for the next five years until about 2020.

And, if you're like me and most investors, you'd probably be ecstatic to achieve gains a tenth of what was achieved during the first Cold War. ***We're talking potential gains of up to 250%, 350%, 400% or more ... all within the next 60 months!***

My goal is to show you *exactly* how you can do this. That's why I've researched and written an exclusive guide on the most profitable ways to protect and invest your hard-earned money during this time of geopolitical unrest.

My report —***Putin's 5 War Strategies: What You Must Do Immediately to Protect Your Wealth and Profit*** — is my FREE gift to you. It includes information on the specific, highly targeted investments that will help you take advantage of the unprecedented opportunities now available to investors.

By making a few simple changes to your portfolio over the next couple months (all of which I explain in great detail in my guide), you could join the smart-money investors who have already flocked to the safety and exponential growth now being experienced in key U.S. stock sectors.

But before you do anything, I need to give you an urgent warning ...

Own These Stocks? Better Dump Them Now!

Not all companies in the defense sector will succeed in the years to come. The stocks listed below are simply too risky for a variety of reasons. Some have negative net income. Or a negative return on assets and equity.

For some, the profit margins are low or — in some cases — horribly in the red. Others suffer from lackluster revenue and earnings growth.

Some are beleaguered companies enduring a mix of these problems ...

In any case, to take advantage of the market, **you must avoid these 10 traps (worst ranked first):**

1. CPI Aerostructures, Inc. (CVU)
2. TAT Technologies, Ltd. (TATT)
3. LMI Aerospace Inc. (LMIA)
4. Tel-Instrument Electronics Corp. (TIK)
5. Kratos Defense & Security Solutions, Inc. (KTOS)
6. RADA Electronic Industries Ltd. (RADA)
7. Erickson Incorporated (EAC)
8. Cubic Corporation (CUB)
9. ManTech International Corporation (MANT)
10. Spirit AeroSystems Holdings, Inc. (SPR)

America's Best Investments for Violent Times

Which companies will profit from the intensifying cycles of war?

Simply put, those companies that provide products and services needed to maintain our military strength. We're talking about ...

- ✓ Arms and weapons manufacturers ...
- ✓ Specialists in producing jets and aircraft parts ...
- ✓ Builders of nuclear and non-nuclear ships, aircraft carriers and submarines...
- ✓ Designers of intelligence-gathering, surveillance, reconnaissance and communication systems ...
- ✓ Cyber espionage experts — companies in the U.S. that will not only monitor what other nations may be doing against us, but also protect us from digital threats!
- ✓ And the list goes on and on!

My research team and I reviewed dozens and dozens of companies, evaluating each one against critical investing metrics to help us determine the companies with the best profit potential.

We looked at gross profits, net income, net profits, earnings and revenue growth, return on assets and equity, among other factors.

Based on our research, only the highest rated companies made the cut and have been included in my free guide, ***Putin's 5 War Strategies: What You Must Do Immediately to Protect Your Wealth and Profit.***

Now I'm ready to tell you about my top three picks ...

- **Recommendation #1** — This Fortune 500 shipbuilding company designs, builds and maintains nuclear and non-nuclear ships for the U.S. Navy and Coast Guard. In fact, they're the *only* company that designs and builds nuclear-powered aircraft carriers in the United States.

They also provide naval architecture and marine engineering, along with after-market services for military ships worldwide and engineering services to the Department of Energy and the Department of Defense.

In just 3 years, shares in this company rose a stellar 374.6%. That means an investment of \$10,000 would have turned into \$47,462!

You'll find the name of this company, along with exact investing instructions, in my free guide, ***Putin's 5 War Strategies: What You Must Do Immediately to Protect Your Wealth and Profit.***

- **Recommendation #2** — Recently formed by a merger of two industry leaders, this mega-company creates and supplies advanced weapon and space systems, including missile systems, precision-guided munitions, satellite components and electronic warfare programs.

Tracing its roots back to a major military contractor that spun off its defense businesses to shareholders, this newly merged company has a long history of supplying defense systems to the U.S. and its allies.

You'll find the name of this company, along with exact investing instructions, in my free guide, ***Putin's 5 War Strategies: What You Must Do Immediately to Protect Your Wealth and Profit.***

- **Recommendation #3** — In my opinion, this is the best choice in the aerospace and defense ETF market, charging investors just 35 basis points a year in fees for its exposure.

The fund currently holds 36 stocks in its basket, including Lockheed Martin, Raytheon, General Dynamics and more.

Recently, this ETF zoomed up 133%. Had you invested \$10,000 of your hard-earned cash, you could have walked away with \$23,325!

You'll find the name of this fund, along with exact investing instructions, in my free guide, ***Putin's 5 War Strategies: What You Must Do Immediately to Protect Your Wealth and Profit.***

In this free report, you'll also learn ...

- ✓ Why cease-fires in the Ukraine won't stop Russia's global war threat ...
- ✓ Which nations Putin might target next in his round of empire building ...
- ✓ Why Obama's attempts to control Vladimir Putin have backfired ... and, in fact, have made him ***an even greater threat*** to the U.S. and our allies ...
- ✓ Why the U.S. cannot rule out a "hot war" with Russia ... and what you need to do now to protect your family and your wealth *before* the chaos starts ...

- ✓ The **four reasons** why the safest refuge for your money is the United States and its capital markets ...
- ✓ And the exact steps you can learn from the smart investors who have already pumped over **\$10 TRILLION DOLLARS** into the U.S. markets.

Then, in future years, when your membership comes up for renewal, we will notify you first and, if you agree, bill your card at the same low price, a 55% discount from the regular rate. You will lock in that discount forever. You will never get billed for something you don't want. And you will never have to worry about missing a single investment opportunity.

For less than 25 CENTS PER DAY, you'll know you've taken a huge step toward safeguarding your future, your wealth and your family's security against the upcoming tidal wave of global chaos.

Don't Just Take My Word — Read What My Subscribers Are Saying ...

Over the past 35 years, I've helped my readers protect and build their wealth through Wall Street's biggest crises, booms and busts. Once you see your first issue of *Real Wealth Report*, I think you'll be hooked for life.

You won't want to make a move without it!

The thanks I've received from my readers over the years are truly humbling and deeply gratifying to me.

Listen to Mary H., of Phoenix, AZ, who says ...

"This is an honest, down-to-earth newsletter whether it's to do with stocks or the day-to-day issues that may affect stocks.

"It has given me another weapon against all the analysts and writers who side with the establishment and Wall Street Cheats."

And John R., of London, U.K., says ...

"I appreciate the way you call it as you see it even when criticized. Obviously, it is amazing that you called it the right way, but more importantly you stick to your guns. Well done and keep doing it."

Gary S., of Ridley Park, PA, adds ...

"In retrospect, I found your insights to be amazingly accurate! This sadly leaves me wishing I had HEEDED your advice (which I didn't do to the detriment of my portfolio). You are now my primary guiding light!!!"

And Brian B., of Garland, TX, says ...

"You're my hero! Keep the insightful commentary coming!"

Why is this man smiling? Well, you would be too, if you had his track record ...

With over three decades of amazingly accurate forecasts, Larry Edelson, *Real Wealth Report* editor, has successfully called nearly all the major turning points in the world's macro-economic trends,

including ...

- ✓ The 20-year bear market in precious metals between 1980 and 2000 ...
- ✓ The Stock Market Crash of 1987 and its subsequent rally to new highs by 1990 ...
- ✓ The Persian Gulf War of 1990 and the S&L crisis in the U.S.
- ✓ The 10-year rocket blast in oil beginning in 1998 ...
- ✓ The bursting of the tech stock bubble in 2000 that cost U.S. investors an estimated \$6.5 trillion in losses ...
- ✓ The start of the major bull markets in Asian economies and stocks in 2004 ...
- ✓ The great debt crisis, and crash, of 2008 ...
- ✓ The major bottom in stocks in March 2009 and the giant rally that followed ...
- ✓ And, most recently, the freefall in oil prices in 2014, which Larry warned his readers about **a full year before the decline ...**

And just listen to Dominic B., of Stockton-On-Tees, U.K.:

"I find that Larry is one of the very few people worth listening to as he has a unique perspective on the markets and an amazing ability to explain what is going on in the markets.

"With Larry's advice I feel confident and well positioned to profit from these unprecedented times. Great work, Larry!"

Your Family's Financial Future Hangs in the Balance.

Hope is a powerful agent for change; but so is regret.

If you don't act *now* to protect yourself, and your family, from the unprecedented dangers we face — and to position yourself to profit from the historic opportunities that will present themselves ...

You will be kicking yourself for years to come.

In this report, I've shown you how the global war cycles are just beginning and will continue to dominate the news and our lives well into the year 2020 ...

I've described how panicked investors worldwide are bringing their investment money to the U.S. in droves — to the tune of \$10 TRILLION DOLLARS ... and why this is very good news for your wealth ***if you act quickly to take advantage of this window of opportunity ...***

I've described to you the NEW Cold War between Russia and the United States and how certain stock sectors will benefit enormously ...

I've named the stocks that WENT THROUGH THE ROOF during the first Cold War, ***skyrocketing up an astronomical 2,161% ... 6,888% ... 9,782% ...***

And I've explained how world events are lining up to repeat these huge market gains ... I've told you about stocks that have ***already zoomed up 180%, 218%, 374% ...*** with plenty of upside potential as global conflict escalates all the way to the year 2020 ...

But, please, keep in mind the process of change we'll be experiencing during the next 5 years is going to be chaotic, wild and even violent at times. In society and, as a result, in the financial markets.

The good news: *America will get through this.*

Order your risk-free subscription to *Real Wealth Report* now and I promise you'll receive the road map you need to get you, and your family, through the years ahead safely and profitably.

I look forward to welcoming you to the Real Wealth family.

Yours for maximum profits,

Larry Edelson
